Insurance Consulting and Litigation Support
Insurance Consulting and Litigation Support

Walter P Moore’s Insurance Consulting and Litigation Support team consults and directs the investigation of civil and structural losses. Our firm’s 88 years in designing and solving challenging structural, enclosure, infrastructure, and water resources issues has created an environment that celebrates creative problem solving. We support your organization with forensic analysis to determine the cause and origin of complex matters. Our thorough and responsive investigations provide you with details to resolve matters and move cases forward. Our 600+ professionals, strategically placed in the U.S. and abroad, offer a full array of services and capabilities.

Your Forensic Specialists

The forensic consultants and licensed professional engineers at Walter P Moore provide insurance and litigation support services, consulting as expert witnesses to insurance professionals, attorneys, property owners, designers, and others involved in property and construction losses, including those resulting from catastrophic incidents.

We utilize our technical backgrounds to help clients with pre-disaster assessments, post-disaster investigation and evaluations, extent-of-damage evaluation, cause and origin investigations, building code analysis, and CAT response. We harness the firm’s resources and experience to analyze incident sites, perform comprehensive review of available documentation, and provide independent analysis.

Walter P Moore uses innovation and technology to provide creative solutions for complex matters. We determine root causes of distress and develop strategies for presenting insurance and litigation cases in a professional and ethical manner. We make every effort to understand your needs to deliver a thorough, and timely product.
